*Rule (n).—*The following explosives are absolutely excluded from the harbour:—

- Class 4, Chlorate mixture;

**PRECAUTIONS IN LIGHTERS, BARGES AND BOATS.**

Rule (g).—Barges, lighters and boats about to be used for the transport of any explosives shall be kept scrupulously clean and, free from loose explosives, and shall not, when at anchor with explosives on board, lie closer than one cable's length or 200 yards from any of the ships lying in the port or from any public landing place, and all explosives in any such barges, lighters or boats shall be securely covered with tarpaulins. Whilst any such explosives shall remain on board, a red flag shall be kept flying on every such barge, lighter or boat between mast and mainmast and, in addition to the regulations aforesaid, a red light in an elevated position shall be shown from any such barge, lighter or boat between mast and mainmast. No fire, smoking or matches shall be allowed on board any such barge, lighter or boat, nor any light of any kind except the red light mentioned above—except on the case of properly-destined barges on the dock of which may be allowed one lantern of good pattern. **PRECAUTIONS ON THE TRAIL WHILE EXPLOSIVES ARE BEING LANDED OR UNLOADED.**

Rule (i).—Explosives which may be landed or shipped inside the harbour under rule (g), if properly packed as required by rule 9 of the rules issued by the Government-General in Council under section 5 of the Indian Explosives Act of 1881, may be shipped on board, or discharged from, a vessel lying at the ordinary moorings within the harbour. Each shipment or discharge shall be effected under the precautions and conditions mentioned and contained in these rules, and such explosives must be taken on board the vessel for which they are intended immediately after the boat carrying such explosives has come alongside. No cargo boat or other vessel having fire on board shall be allowed to lie closer than one cable's length or 200 yards from such vessel during the time that any explosives are being shipped. All other cargo work on board such vessel shall be stopped while such shipment or discharge is taking place.

**PRECAUTIONS IN THE MATTER OF FIRES.**

Rule (f).—When explosives—other than those mentioned in rules 1 and 2, of the rules made by the Governor-General in Council under section 5 of the Indian Explosives Act, 1881—are shipped or discharged within the Madras port limits, no smoking or tobacco will be permitted on board the vessel on which they are being shipped or from which they are being discharged, and all fires and lights on board shall be extinguished before the barge, lighter or boat bringing such explosives for shipment, or receiving such explosives to be loaded, shall come alongside of such vessel. Should it be necessary, in the case of a steamer, that the fire in her engine room should remain lighted, the barge, lighter or boat so bringing or receiving such explosives shall be placed to the windward of the steamer's funnel, and in the event of the steamer swinging, such explosives must be covered with tarpaulins until such barge, lighter or boat is removed to a safe and proper position.

But if such magazine should be opened and, in the opinion of the Board, the emergency was not such as to justify the master of the vessel in opening it or allowing it to be opened, he shall be deemed to have contravened this rule. Such magazine shall remain opened only for the time required to remove or stow explosives, and that operation shall always be performed in the presence of an officer of the ship.

#### *Revised rules for combating epidemics of cholera in municipalities.*

1. It is now a generally accepted belief that the infection of cholera is conveyed by microbes which exist in the vomit and stools of persons attacked thereby. The present rules are for the immediate destruction of these microbes. Should they remain undestroyed, there is imminent risk that they may be conveyed into positions in which they will be swallowed by other persons and so infect them with the disease, for rule would carry them into drinking-water supplies, and the vomit and stools and other insects would carry them into articles of food.

2. It is the object of these rules to ensure that the earliest possible information of every attack of cholera should be conveyed to the authorities. This will enable them to protect the spread of the disease, by taking steps to destroy the microbes existing from each early case and by procuring medical assistance and means of disinfection.

3. Municipal Councils shall be responsible for the general carrying out of these rules. In municipalities where a Health Officer is employed the Health Officer shall be responsible for the necessary medical arrangements; in municipalities where there is no Health Officer but a Civil Surgeon the latter shall be responsible for these arrangements; in all other cases whether in district townships or elsewhere District Medical and Sanitary Officers. The preventive staff referred to in rule 12 below shall work under the Health Officer, the Civil Surgeon or the medical officer designated by the latter of Medical and Sanitary Officer to carry out necessary arrangements, or, in the absence of such designations, under the senior Medical Officer on the spot as the case may be, while the observation staff mentioned in rule 8 shall work directly under the Chairman.

4. For the purposes of these rules every municipality to which they apply shall be divided into "circles" which shall, as far as possible, follow ward divisions, so that they may be readily comprehended. In municipalities where there are wards containing less than 1,000 houses and a population of less than 5,000 persons each, two or more wards may be assigned to one circle. Towns circles shall ordinarily have a division, and in no case shall a division contain more than four circles. Chairmen should sign out their towns into "circles" and "divisions" and after approval by the Collector send the maps to their officers, sending copies to the Health Officer or to the Senior Medical Officer of the municipality.

5. For each division the Chairman shall at once prepare and submit to the municipal stores not less than the following quantities of apparatus and disinfectants; he is responsible for seeing that these stores are always in stock and that they are in good condition:—

Twelve portable tin containers for disinfectants.

Five lb. packets of carbolic acid.

Five lb. containers of hydrochloric acid.

Five lb. packets of lime.

Six hundred lb. of saw dust and 600 lb. of washed lime.

7. **Observation.**—Should it appear to the Collector of the district that cholera is imminently threatened in any municipality to which these rules apply, he shall name the Chairman of the Council, the Health Officer, if any, and the Civil Surgeon or the District Medical and Sanitary Officer and the Senior Medical Officer of the town accordingly.

8. Upon receipt of such warning or of information from the Validadar, Deputy Validadar or village officer or otherwise of the occurrence of cholera in any town then it is imminently threatened, the Chairman shall immediately appoint an observation staff which shall consist of not less than ten inspectors, a peon and a tot for each circle and of a divisional inspector and an orderly for each division. The peon shall, he allowed a jukka, pooty or other means of conveyance, to enable him to carry orders without delay. The Chairman shall at once report to the Collector the staff employed and the date from which it has been employed and shall comply with any instructions which the Collector may issue on the subject.

*Note.*—The salaries and allowances of the staff should not exclusively consist of the following rates which in the case of rural and desamral regions should be granted only in addition to specified salary or monetary monetary incentives, viz.

Circle Inspectors .. .. .	Rs.
Observation allowances .. .. .	10
Circle peon .. .. .	5
Circle tot .. .. .	5
Divisional inspector .. .. .	10
Observation allowances .. .. .	10
Orderly .. .. .	5
Peon or peon allowance in entirety .. .. .	5

9. The staff may include on credit of competent temporary hands, if available. Otherwise it should be drawn from the existing sanitary establishment of the municipality, whose local knowledge will be valuable. In the latter case, the vacancies so caused should be filled by temporary hands who should be paid at the rates sanctioned for the establishment.

10. It will be the duty of the members of the observation staff to conscientiously and systematically patrol the whole of their circle and to get early information as to the first case of cholera or severe disorders occurring therein, in order that immediate action may be taken. At such times, cases of severe disorders should be considered to be as dangerous as cholera. The members of the observation staff should also be employed in co-operation with the aid of the ordinary sanitary establishment, all defects in sanitation which would favour the dissemination of the cholera virus.

11. They should further warn the inhabitants of the circle to adopt the precautions against cholera prescribed in the extract from Surgeon-Lieut-Colonel King's "Simple Sanitary Rules" which is printed as an appendix to these rules and should distribute gratis and as widely as possible copies of these instructions which the Chairman will keep ready printed in the verandah.

12. The Chairman, divisional and municipal officers if available should assist the observation staff and police in every way which is compatible with their other duties in getting information of first attacks and in removing sanitary defects in the circle.

13. **Prevention of epidemic.**—On receipt of information of a first attack of cholera the Chairman shall at once convert the observation staff of the circle concerned into a preventive staff by the addition of three peons and three tots or such other establishment as the Collector in consultation with the District Medical and Sanitary Officer shall consider necessary.

14. The preventive staff shall visit every house in which cholera has occurred and shall see the greatest care is being that all choleraic vomit and excreta are at once effaced, mixed with

\* One peon of medical staff to be posted at one door.

caliche, raw dung, paddy husk, or other com-

monest oil and burnt on or near the premises. The Chairman shall delegate to the Health Officer or Senior Medical Officer of the town and to any other persons who may have to act under this rule his powers of entering and inspecting houses under section 219 (5) of Act IV of 1904.

15. Bags stained with vomit or excreta should be burnt on the spot, full compensation in money or kind being offered in the case of the really poor; clothes and bedding may be boiled in disinfectants and returned.

16. After a case of cholera the house (and especially the room, which the patient occupied), the floor, the walls and the furniture should be thoroughly disinfected with a solution of

1 lb. of hypochlorite per gal.

1 lb. of hypochlorite per gal.

1 gallon (or one pint) of water with a pinch of salt per gallon to which 1 pint of caustic soda.

the solution. All drains which discharge into the open should be flushed with the peroxide solution.

*Note.*—Various brands of carbolic acid should be used for spraying about this solution, as it destroys most insects, and the power of formal peroxide should be noticed. "Formal" is English and the remainder only translated to the Bengali language.

It is most desirable that the streets of a place for at least ten days after the occurrence of an attack should be regularly washed, disinfected and covered with earth, or they shall contain drains, sewers, for that purpose a Sanitary Survey and report, that drains should be provided, if the Council so direct, for the purpose mentioned.

17. The greatest courtesy and consideration should be used in all cases by the preventive staff, when carrying out these instructions.

18. The Chairman shall provide the medical officers responsible for working the rules with a permanent advance of Rs. 50 for each division; the advance should be recovered from time to time by bills supported by vouchers where possible.

19. The preventive staff shall be mustered in an affected circle for ten days after the last attack of cholera therein, and the observation staff shall be maintained in all circles or in such groups of circles as the Collector may approve for ten days after the last attack in the town. During this time they should be employed in searching sanitary defects.

20. *Nightingale.*—There shall be a head-quarter in each division at which a medical sub-station shall reside who shall be supplied with medicine and medical comforts from the municipal hospital for the treatment of persons attacked. He will also be available for attendance free of charge on the sick in their own houses.

This shall also be the head-quarter of the division inspector and of the preventive staff as night duty.

21. In one place at least in each town there shall be isolation huts with separate accommodation for males and females for the treatment of those who desire treatment or who are brought there. These huts shall be in charge of a medical sub-station and staff and shall be supplied with equipment, medicines and medical comforts. The medical sub-station shall be reported to an officer daily. He shall reside with his staff on the spot and shall be adequately housed.

22. Charges for medical treatment under these rules shall be met from the allotment in the budget under the head "Grant 3. Hospitals and dispensaries."

23. The head-quarters of the divisions and the sites for the isolation hospitals shall be at once selected and shall be marked on the maps referred to in rule 5 above.

24. In order to make provision for meeting the charges under the portions of this scheme relating to observation and prevention, the Council of every municipality to which the scheme applies shall be required to set in every budget under "Cholera charges" a sum which shall be in the proportion of Rs. 1,000 to every 25,000 inhabitants in the municipality. This shall be called the "Cholera reserve" and shall not be spent upon any object except the carrying of the scheme into execution.

25. The provision of this reserve should not be allowed to interfere with the existing percentages to the total municipal revenue of the expenditure upon communications, education, sanitation, etc., and the total of the allotment made for sanitary purposes under Grants 1, 2 and 3 taken together, but should be set aside from funds which are at present usually expended upon sanitary works of a permanent nature.

26. The Health Officer or medical officer responsible for working these rules shall, within seven days of the final withdrawal of the special staff, forward a report on the epidemic and the operation of the rules through the Chairman of the municipality to the Collector for the notice of Government. In cases in which the medical officer in question is subordinate to the District Medical and Sanitary Officer or the Civil Surgeon, the report shall be forwarded through these officers. All such communications shall be submitted to Government through the Sanitary Commissioner.

SALT, REVENUE AND CUSTOMS DEPARTMENT.

NOTIFICATION.

No. 8, dated 10th February 1918.

NOTICE OF CONDITIONS OF ISSUE OF FIXED PER FOREIGN LIQUOR LICENCES.

The following notification is issued in pursuance of Notification No. 7, dated 10th February 1918, published in the Supplement to the Port St. George Gazette, Part II, dated 14th February 1918.

In execution of the power conferred on me under section 4 (g) of the Madras Alkali Act (I of 1904), the Commissioner of Salt, Alkali, and Naptha Revenue hereby prescribes, under section 74 of the Act, the following rules for regulating the issue of Licences on Fixed Fee for the manufacture, blending, bottling and sale of potable foreign liquor from and after the 1st April 1908 within the limits of the Madras Presidency:—

1. The term "foreign liquor" in these rules includes all wine, spirits and beer imported into the Presidency by sea or land; also rectified spirits imported as locally made and as which the tariff rate of duty has been paid; all spirits manufactured or compounded in the factory and made in spirit and flavoured to resemble gin, brandy, whiskey or rum (or spirits made in Malabar from measured toddy, called "Malabar arrack") and issued at the tariff rate of import duty; and beer brewed in India or here imported in a condensed form and otherwise unaltered and potable beer and fully mixed, but unblended, denatured spirits and medicinal spirits. In the case of liquors to be sold, Druggists and others approved for the purpose, however, for the sale of pure rectified spirits only, the term "foreign liquor" means pure rectified spirits imported from foreign countries by sea or manufactured in that country and issued at the tariff rate of duty.

Note.—The minimum strength of spirits imported and locally made foreign spirits are to contain 40° P.P. for the wet and 50° P.P. for all other kinds of spirits including Malabar arrack, except denatured spirits and Malabar, Indian and spirituous wine.

2. "Native" here is beer brewed in India (a) which contains at least two bushels of malt and two pounds of hops per hogshead and is the manufacture of which jaggery or molasses was never employed, (b) which is brewed at a higher original gravity than 1.060° on a standard hydrometer and (c) the maximum price of which at the brewery is Rs. 4000 per hogshead including the excise duty of three annas per gallon.

3. Licences for the sale of foreign liquors shall be of the following descriptions:—

I. Wholesale license for the sale of foreign liquor not to be dealt in the premises.—There will be issued on an annual fee of Rs. 100 at the discretion of the Collector. Under these licenses the sale of liquor in quantities less than two Imperial gallons or a dozen mixed glass bottles in two dozen repeated pint bottles of each kind at a time is prohibited. The holder of this license will have the privilege of storing in bonded houses other supplies of liquor in quantities not exceeding one picul in Madras town, but none of this liquor will not be allowed to sell "retail" here.

VIII. *Licence for the sale of pure rectified spirits*.—There will be issued to Chemist and Dispensary firms and other firms as persons specially approved by Collector, on payment of an annual fee of Rs. 10. While there remains the possession of pure rectified spirits in excess of two imperial gallons (or such larger quantity as the Collector may, in consultation with the officers of the Fish, Abroad and Customs Department, specially authorize) or prohibited. Pure rectified spirits must not be sold under three licenses for other than food, medicinal, industrial and scientific purposes, and the maximum bulk of sale at one time to the same person is restricted to one imperial pint as the case of sale to a private individual, two imperial pints in the case of sale to a Chemist, medical practitioner or scientific body and three imperial gallons in any dispensary, food, food or medicinal hospital.

IX. *Licence for the sale, as such or otherwise, of rectified wine and similar preparations containing 50 per cent. and upwards but not more than 45 per cent. of proof spirit* will be issued by Collector on payment of an annual fee of Rs. 10.

3. *Licence for supplying and* *supplying foreign spirits* will be granted to holders of wholesale licence by Collector and those for supplying to licensed retailers by the Deputy Commissioner of Abroad on payment of an annual fee of Rs. 100.

4. *Licence for the holding of foreign spirits, except beer brewed locally*, will be granted to holders of wholesale licence by Collector and to licensed retailers by the Deputy Commissioner of Abroad on payment of an annual fee of Rs. 10.

5. Any two or more of the above kinds of licence may be granted to the same person for the sale of liquor in the same premises.

6. No premises shall be used for the sale of liquor unless and until approved by the Collector.

7. All orders issued by Collector under these rules will be subject to appeal to the Board of Revenue, whose decision will be final.

8. All licences (other than provisional and special licences) will have effect for the official year, i.e., from the 1st April in each year until the 31st March of the following year.

9. The fixed fee amounting Rs. 40 on all licences (other than special and provisional licences) will be payable in two instalments, one half being payable when the licence is issued and the other half at the beginning of the second half-year, i.e., 1st October.

10. For the convenience of the trade, Collectors will, as far as possible, receive and dispose of applications for licences under clause IV (b) to have effect during the following official year before the licence takes effect for that year. Licences for the sale of liquor as medicinal refreshment should be very sparingly given.

11. All further information may be obtained and forms of licence may be procured at a charge of two annas each at the office of Collector.

12. The Board of Revenue in the department of Separate Revenue will issue such subsidiary instructions as may be necessary to the carrying out of these rules.

Board of Revenue (Separate Revenue),
